PROFESSIONAL SUMMARY

Results-driven System Engineer and First-Class Honours Computing graduate with experience supporting expertise and banking infrastructure. Currently as a Senior Assistant Associate System Engineer at CB Bank, supporting an estate of approximately 200-300 Windows and Linux servers, Cloud Migrations and MMQR Banking services. Hands-on experience with AWS, Huawei Cloud, PostgreSQL, Clustered services, Zabbix monitoring, Network security and AI automation. Also develops AI education materials and EdTech tools but my strongest abilities are in Technical Management where I take product strategy through to business outcomes, lead cross-functional teams and scale technology for real-world impact.

WORK EXPERIENCE

Senior Assistant Associate System Engineer | CB Bank *Aug 2026 - Present*

Banking Infrastructure and Cloud

- Support banking infrastructure comprising approximately 200-300 Windows and Linux servers in an on-premises environment
- Contribute to migrating selected on-premises workloads to Huawei Cloud and AWS to support performance requirements
- Support the MMQR project across API, network, backend and database services, gaining hands-on experience with banking transaction services and clustered infrastructure
- Work with PostgreSQL queries and table structures to support MMQR database operations and service investigation
- Monitor server healh and operating conditions across the infrastructure using Zabbix

JuniorSystem Engineer | NTT DATA Myanmar *Aug 2025 – July 2026*

Enterprise network infrastructure and Fortinet environment migration specialist.

- Leading migration design of SIMM Infrastructure design
- Administer and maintain Windows Server and Linux environments to ensure high availability and reliability
- Monitor infrastructure health using network and system monitoring tools for proactive issue detection
- Provide L2 technical support for servers, network devices, and enterprise applications in production
- environments
- Troubleshoot system and database incidents through log analysis
- Manage SSL/TLS certificate migration from BIG-IP F5 to FortiADC with health check investigation
- Perform PostgreSQL operations (SELECT queries) for data validation, reporting, and incident
- investigation
- Configure LAN/WAN, VLANs, routing, Check Point firewall policies, and VPN configurations for
- enterprise connectivity and network operations
- Deploy and maintain VMware/Hyper-V virtual machines; implement backup/recovery procedures for
- efficient resource utilization
- Automate routine administrative tasks using PowerShell and Bash scripting; coordinate with vendors
- and cross-functional teams
- Participate in incident response and root cause analysis to prevent recurring system issues
- Assist in endpoint security management (Trend Micro) including troubleshooting agent and update-related issues
- Gain hands-on experience in system renewal and lifecycle management, including firmware upgrades and device replacement
- Contribute to System Infrastructure Construction/Deployment phases, assisting with system renewal and network configuration and validation
- Maintain current network infrastructure to minimize downtime and improve service performance

AI Engineer (Part-time) | Tiny Equations *Apr 2026 – Present*

- Develop an AI-powered LMS, contributing frontend and backend interfaces and API integration with GCP, Cloud SQL for application data, Cloud storage for upload files and Identity platform for user authentication
- Develop Python/FastAPI services connecting LMS features with databases, cloud storage, authentication and role-based access controls
- Intregrate AI assessment workflows, document processing, automated grading
- Support asynchronous processing, job queues, and service health monitoring for workloads

AI Educator (Part-time) | Candellar *Apr 2026 – Present*

- Develop and deliver GenAI curriculum for students aged 8–14 across AI Design Major levels
- Design kid-friendly PowerPoint slide decks covering AI fundamentals, prompt engineering, generative AI tools, and AI career pathways
- Collaborated with education internal team to develop and iterate on course materials
- Apply age-appropriate pedagogy with visual storytelling, relatable analogies, and hands-on activity framing

EDUCATION

B.Sc. (Hons) Computing, 1st Class Honours
EdinburghNapierUniversity (Scotland,UK)
2023 – 2025

HNC / HND in Computing, Grade Merit
Info Myanmar College(Pearson,UKAccredited)
2020 – 2023

Certifications: ITIL 5 (IAT), ESXI 8 (IAT), AWS SAA (IAT), Red Hat Linux (BNN Tech), Google Cloud Artificial Intelligence (Coursera), Generative AI (Coursera)
English Certification: Duolingo English Test (110)

TECHNICAL SKILLS

Network& Security: FortiGate, FortiADC, FortiAnalyzer, FortiManager, FortiSwitch, Check Point, BIG-IP F5, IPsec VPN, VLAN design,LAN/WAN architecture, SNMP Monitoring, Policy Management, SSL/TLS

Monitoring & Tools: Hinemos, Trend Micro, SNMP Trap Configuration, Zabbix

Systems & Servers: Windows Server, Linux (Ubuntu/RHEL), VMware, Hyper-V, PostgreSQL, Bash, PowerShell

Cloud & DevOps: Azure, AWS, Terraform, GCP, CI/CD, Docker, Git/GitHub

Development: Python, React, Flask, MongoDB, MySQL, HTML/CSS/Bootstrap, Figma, MS Office, Power BI

Frameworks: ITIL 5, Agile (Scrum,Kanban), SDLC, Redmine

KEY ACADEMIC PROJECTS

Sign LanguageRecognitionSystem (B.Sc.HonsProject)

- Built a real-time sign language recognition system using CNN, OpenCV, MediaPipe, and TensorFlow achieving high classification accuracy

Streamflix – AI-Powered Movie Streaming Platform (Individual Project)

- Developed a full-stack AI movie recommendation and streaming app using React, Flask, and MongoDB

Network Security & Cryptography Lab (Individual Project)

- Deployed cloud instances and implemented IDS to detect and monitor botnet activity

DevOps – Population Info System (Team Lead)

- Led DevOps-driven development using CI/CD pipelines and SQL reporting; managed team delivery and sprint planning

Secure Software Development Lab (Individual Project)

- Secured a university portal by identifying critical vulnerabilities and implementing role-based access controls

Group Project – Bus Ticket Booking System (Project Manager)

- Led thedevelopment of a responsive online ticket booking system with CI/CD and SQL reporting

Transport Network Design (Junior Network Engineer)

- Designandsecured a 3-layer hierarchical network model with optimized performance and reliability

Network Management (Network Engineer)

- ManageLAN/WAN infrastructure with secure VPNs set up and proactive network monitoring tools.

LANGUAGES

Burmese: Native

English: Professional working proficiency
